DETAILED ACTION

Application and Claims Status

1. Applicant's preliminary amendments filed on 01/13/2005 and 09/27/2005 are acknowledged and entered.
2. Claims 1-17 were pending. Applicants have amended claims 1, 3-6, 11, and 12; and cancelled claim 2. No claims were added. Therefore, claims 1 and 3-17 are currently pending and are under consideration in this Office Action.

Election/Restrictions

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-14, drawn to an uneven display correction method with the first step previously determining a value as a correction parameter in each unit area, the value corresponding to a difference between a light-emission start gradation level of the unit area and the light-emission start gradation level of the reference area.

Group II, claims 15-17, drawn to an uneven display correction method with the first step previously determining a correction parameter for approximately calculating a difference in input video signal for the same brightness between a light-emission efficiency characteristic for each input video signal level in the unit area and the light-emission efficiency characteristic for each input video signal level in the reference area in each unit area, with the use of the input video signal level as a variable.

Art Unit: 2629

4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The presently claimed inventions recite the method of correcting uneven display wherein the type of display would encompass any type of light-emitting display such as plasma display, field emission display, light emitting diode (LED) display, or organic light emitting diode (OLED) display. These displays are well known in the art wherein it is art recognized that they are each structurally distinct from each other. Hence, there is no unity of invention.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
